 adjusted EPSDEERFIELD, III.--(BUSINESS WIRE)--Oct. 11, 2018-- Walgreens Boots Alliance, Inc. (Nasdaq: WBA) today announced financial results for the fiscal year and fourth quarter that ended August 31, 2018.

Executive Vice Chairman and CEO Stefano Pessina said, "We are pleased to have delivered double digit percentage growth in earnings per share while returning $\$ 6.8$ billion to shareholders through share repurchases and dividends in fiscal 2018. The integration of the acquired Rite Aid stores is on track, and our pharmacy market share in the U.S. increased year-over-year on an annual basis. We are making progress on our partnership strategy both in the U.S. and internationally, including our most recent announcements with LabCorp, Kroger and Alibaba, which will provide additional opportunities for future growth."

## Company Outlook

The company today introduced guidance of 7 percent to 12 percent estimated growth in fiscal year 2019 adjusted earnings per share, at constant currency rates. The guidance assumes current exchange rates for the rest of the fiscal year and results in an adjusted EPS range of $\$ 6.40$ to $\$ 6.70$ for fiscal 2019. The guidance also assumes continued execution of our previously announced $\$ 10$ billion share repurchase program, including the expected repurchase of approximately $\$ 3$ billion worth of shares in fiscal 2019.

## Business Divisions

## Retail Pharmacy USA:

Retail Pharmacy USA had fourth quarter sales of $\$ 25.5$ billion, an increase of 14.4 percent over the year-ago quarter. Sales in comparable stores increased 0.3 percent compared with the same quarter a year ago, and showed sequential improvement from the third quarter.

Pharmacy sales, which accounted for 73.6 percent of the division's sales in the quarter, increased 16.7 percent compared with the year-ago quarter, primarily due to higher prescription volume from the acquisition of Rite Aid stores and from central specialty. Comparable pharmacy sales increased 1.3 percent, reflecting higher volume. Reimbursement pressure and generics had a negative impact on comparable pharmacy sales growth, partially offset by brand inflation. The division filled 279.8 million prescriptions (including immunizations) adjusted to 30 -day equivalents in the quarter, an increase of 11.8 percent over the year-ago quarter. Prescriptions filled in comparable stores increased 1.3 percent compared with the same quarter a year ago, primarily due to strategic pharmacy partnerships, partially offset by Medicare Part D. The division filled a record of more than 1 billion prescriptions, adjusted to 30-day equivalents, in fiscal 2018.

The division's retail prescription market share on a 30-day adjusted basis in the fourth quarter increased approximately 180 basis points over the year-ago quarter to 22.3 percent, as reported by IQVIA. Market share in fiscal 2018 expanded to 21.7 percent, the division's highest ever annual share, compared with 20.2 percent in fiscal 2017.

Retail sales increased 8.3 percent in the fourth quarter compared with the year-ago period, reflecting the acquisition of Rite Aid stores. Comparable retail sales were down 1.9 percent in the quarter, with declines in the consumables and general merchandise category and in the personal care category, partially offset by growth in the health and wellness category and in the beauty category.

Gross profit increased 4.1 percent compared with the same quarter a year ago and adjusted gross profit increased 2.8 percent.
Fourth quarter selling, general and administrative expenses (SG\&A) as a percentage of sales decreased 3.0 percentage points compared with the year-ago quarter, primarily due to cost savings in the quarter and costs related to acquisitions in the year-ago quarter, partially offset by the higher cost mix of acquired Rite Aid stores. On an adjusted basis, SG\&A as a percentage of sales decreased 1.8 percentage points in the same period, due to cost savings and sales mix, partially offset by the higher cost mix of acquired Rite Aid stores.

Operating income in the fourth quarter increased 39.4 percent from the year-ago quarter to $\$ 1.1$ billion. Adjusted operating income in the fourth quarter increased 0.1 percent from the year-ago quarter to $\$ 1.4$ billion.

## Retail Pharmacy International:

Retail Pharmacy International had fourth quarter sales of $\$ 2.9$ billion, a decrease of 1.9 percent from the year-ago quarter. Sales decreased 2.7 percent on a constant currency basis.

Comparable pharmacy sales decreased 3.4 percent on a constant currency basis, primarily due to lower prescription volume and a decline in UK pharmacy funding. Comparable retail sales decreased 0.9 percent on a constant currency basis, mainly due to Boots UK, where the beauty category declined in a challenging market, partially offset by higher sales in the health and wellness category. Excluding the UK, comparable retail sales rose 1.1 percent, with good growth in the Republic of Ireland and Thailand.

Gross profit decreased 0.1 percent compared with the same quarter a year ago. On a constant currency basis, adjusted gross profit decreased 1.1 percent.

SG\&A as a percentage of sales increased by 0.1 percentage point. Adjusted SG\&A as a percentage of sales, on a constant currency basis, increased by 0.7 percentage point.

Operating income in the fourth quarter increased 6.8 percent from the year-ago quarter to $\$ 234$ million, while adjusted operating income decreased 0.8 percent to $\$ 259$ million, down 2.3 percent on a constant currency basis.

## Pharmaceutical Wholesale:

Pharmaceutical Wholesale had fourth quarter sales of $\$ 5.6$ billion, an increase of 2.3 percent from the year-ago quarter. On a constant currency basis, comparable sales increased 4.7 percent, with strong growth in emerging markets.

Operating income in the fourth quarter was $\$ 163$ million, which included a gain of $\$ 49$ million from the company's equity earnings in
AmerisourceBergen, compared with operating income of $\$ 96$ million in the year-ago quarter, which included a loss of $\$ 8$ million from the company's equity earnings in AmerisourceBergen. Adjusted operating income increased 0.5 percent to $\$ 222$ million, up 2.7 percent on a constant currency basis.

The following information provides reconciliations of the supplemental non-GAAP financial measures, as defined under SEC rules, presented in this press release to the most directly comparable financial measures calculated and presented in accordance with generally accepted accounting principles in the United States (GAAP). The company has provided the non-GAAP financial measures in the press release, which are not calculated or presented in accordance with GAAP, as supplemental information and in addition to the financial measures that are calculated and presented in accordance with GAAP.

These supplemental non-GAAP financial measures are presented because management has evaluated the company's financial results both including and excluding the adjusted items or the effects of foreign currency translation, as applicable, and believe that the supplemental non-GAAP financial measures presented provide additional perspective and insights when analyzing the core operating performance of the company's business from period to period and trends in the company's historical operating results. These supplemental non-GAAP financial measures should not be considered superior to, as a substitute for or as an alternative to, and should be considered in conjunction with, the GAAP financial measures presented in the press release. The company does not provide a reconciliation for non-GAAP estimates on a forward-looking basis (including the information under "Company Outlook" above) where it is unable to provide a meaningful or accurate calculation or estimation of reconciling items and the information is not available without unreasonable effort. This is due to the inherent difficulty of forecasting the timing or amount of various items that have not yet occurred, are out of the company's control and/or cannot be reasonably predicted, and that would impact diluted net earnings per share, the most directly comparable forward-looking GAAP financial measure. For the same reasons, the company is unable to address the probable significance of the unavailable information. Forward-looking non-GAAP financial measures provided without the most directly comparable GAAP financial measures may vary materially from the corresponding GAAP financial measures.

## Constant currency

The company also presents certain information related to current period operating results in "constant currency," which is a non-GAAP financial measure. These amounts are calculated by translating current period results at the foreign currency exchange rates used in the comparable period in the prior year. The company presents such constant currency financial information because it has significant operations outside of the United States reporting in currencies other than the U.S. dollar and this presentation provides a framework to assess how its business performed excluding the impact of foreign currency exchange rate fluctuations.

## Comparable sales

For our Retail Pharmacy divisions, comparable stores are defined as those that have been open for at least 12 consecutive months and that have not been closed for seven or more consecutive days, undergone a major remodel or been subject to a natural disaster during the past 12 months. Relocated and acquired stores are not included as comparable stores for the first 12 months after the relocation or acquisition. Comparable store sales, comparable pharmacy sales and comparable retail sales refer to total sales, pharmacy sales and retail sales, respectively, in such stores. For our Pharmaceutical Wholesale division, comparable sales are defined as sales excluding acquisitions and dispositions. The method of calculating comparable sales varies across the industries in which we operate. As a result, our method of calculating comparable sales may not be the same as other companies' methods.

Comparable sales are presented on a constant currency basis for the Retail Pharmacy and Pharmaceutical Wholesale divisions. In the fourth quarter of fiscal 2018 compared to the year-ago quarter, the Retail Pharmacy International division's comparable store sales on a reported currency basis decreased 1.0 percent, comparable pharmacy sales on a reported currency basis decreased 2.9 percent and comparable retail sales on a reported currency basis increased 0.2 percent. The Pharmaceutical Wholesale division's comparable sales excluding acquisitions and dispositions on a reported currency basis increased 2.3 percent.

1 Beginning in the quarter ended August 31, 2018, management reviewed and refined its practice to include all charges related to the matters included in certain legal and regulatory accruals and settlements. In order to present non-GAAP measures on a consistent basis for fiscal year 2018, the company included adjustments in the quarter ended August 31, 2018 of $\$ 14$ million, $\$ 50$ million and $\$ 5$ million which were previously accrued in the company's financial statements for the quarters ended November 30, 2017, February 28, 2018, and May 31, 2018, respectively. These additional adjustments impact the comparability of such results to the results reported in prior and future quarters.

2 Discrete tax-only items.

3 Represents the adjustment to the GAAP basis tax provision commensurate with non-GAAP adjustments and the adjusted tax rate true-up.

1 Free cash flow is defined as net cash provided by operating activities in a period less additions to property, plant and equipment (capital expenditures) made in that period. This measure does not represent residual cash flows available for discretionary expenditures as the measure does not deduct the payments required for debt service and other contractual obligations or payments for future business acquisitions. Therefore, we believe it is important to view free cash flow as a measure that provides supplemental information to our entire statements of cash flows.
